Seattle Specialty completes third annual SAS 70 Type II audit.

Everett, WA, Tuesday, December 1, 2009 - Seattle Specialty Insurance Services, Inc. announced today that it has successfully completed a SAS 70 Type II Audit; this is the company's 3rd year of successful completion.

Statements on Auditing Standards (SAS) No.70 are auditing standards developed by the American Institute of Certified Public Accountants (AICPA) and the Seattle Specialty audit was completed by Moss Adams, LLP of Seattle, Washington. A SAS 70 audit validates that an organization has completed an in-depth analysis of their control activities and the Type II audit consists of comprehensive testing those controls over a minimum six month period.

“Successfully executing the SAS 70 audit requirements show commitment to the Seattle Specialty customer” said Vice President - Compliance, Duncan Morrison. “This is another example of our dedication to providing ongoing, secure, and reliable solutions to our clients.”
